

90degree

Acoustic lounge sofa

90degree simply cannot be overlooked. Despite its size, the acoustically effective sofa is extremely flexible. Its individual elements can be rearranged time and again, with the possibility of adding new ones later on. Thus, 90degree proves a variable seating system that can be beautifully configured in any room.

Article no.: C4500

Benefits:

The combination of a modern lounge furniture with excellent acoustic characteristics allows less other acoustic elements. Thus you will save costs and keep a budget targets.

Good fire protection properties ensure that all requirements of low flammability are fulfilled. The certification according to DIN 66084 P -A will guarantee a high level of security.

The individual modules offer infinitely expandable combination variants. Thereby it is possible to create new interior designs again and brings variety to your everyday office.
