

Skiid

Coffee and add-on table

The coffee table Skiid appears to be well-nigh weightless. That's why its strong chromium-plated frame is determined to keep it firmly on the ground. Here the glass table with ground edges stands safe and secure. The smaller Skiid model likes nothing more than to get close to other, but not such that it makes itself unpopular. As a side table, it offers outstandingly good qualities. Skiid is available in various sizes and surface finishes as well as with different tops.
